EDUCATION

B-Tech (Computer Science & Engineering)
P.R.Pote Patil College of Engineering & Managment
08/2024 – 04/2028 | Amravati
8.0 CGPA

HSC (Science), Maharashtra State Board
02/2024 | Morshi
68.00 %

SSC, Maharashtra State Board
03/2022 | Morshi
72.80%

SKILLS

- **Programming & Query Languages** — java - DSA(400+Leetcode Problems) | SQL | python
- **Data Analysis & Libraries** — Pandas | NumPy | Matplotlib | Seaborn | Scikit-learn | Pytorch
- **Data Visualization & BI Tools** — Power BI | Matplotlib | Tableau
- **AI-ML & Deep-Learning** — Machine Learning | Linear & Logistic Regression | Decision Tree & Random Forest | ANN & CNN & RNN & NLP & RAG

KEY STRENGTHS

- Problem Solving, Data Analysis, Machine Learning, Deep Learning, Generative AI, Python Programming, SQL, DSA, Critical Thinking, Team Collaboration, Quick Learning, Communication Skills, Project Development.

PROFILE

Motivated and results-driven B-Tech Computer Science student with strong expertise in Data Science, Machine Learning, Artificial Intelligence, and Software Development. Proficient in Python, SQL, Pandas, NumPy, Scikit-learn, PyTorch, Power BI, and data visualization tools, with hands-on experience building and deploying end-to-end Data Science, Machine Learning, RAG, and Generative AI projects. Strong problem-solving abilities demonstrated through solving 400+ DSA problems and developing real-world applications. Passionate about leveraging data and AI technologies to solve complex business challenges, continuously learning emerging technologies, and contributing to innovative, data-driven organizations while growing as a Data Scientist and AI Engineer.

PROJECTS

Number Recognition System using Machine Learning & Deep Learning

- Developed a handwritten digit recognition system capable of identifying numbers from image inputs.
- Performed data preprocessing, normalization, and feature engineering to improve model performance.
- Implemented and compared Machine Learning and Deep Learning models for digit classification.
- Built and trained a Neural Network using **Python, TensorFlow/Keras, NumPy, Pandas, and Scikit-learn**.
- Evaluated model performance using accuracy and classification metrics, achieving reliable prediction results.
- Created an end-to-end pipeline for image processing, model training, and digit prediction.
- Demonstrated practical applications of computer vision and deep learning techniques in pattern recognition tasks.

AI Video Assistant (RAG + LLM)

- Developed an AI-powered Video Assistant that enables users to interact with video content through natural language conversations.
- Built a Retrieval-Augmented Generation (RAG) pipeline to extract, process, and retrieve relevant information from video transcripts.
- Integrated Large Language Models (LLMs) to generate context-aware and accurate responses based on video content.
- Implemented text embedding and vector database storage for efficient semantic search and information retrieval.
- Developed a user-friendly interface for asking questions and receiving instant answers from video knowledge bases.
- Applied NLP techniques for transcript processing, chunking, embedding generation, and contextual retrieval.
- Designed an end-to-end workflow covering video ingestion, transcript extraction, vector storage, retrieval, and response generation.
- Improved information accessibility by allowing users to quickly locate key insights from lengthy videos without manual searching.

PROFESSIONAL EXPERIENCE

Data Scientist
ALTAIR (EduSkills Virtual - Internship)
10/2025 – 12/2025 | Amravati Maharashtra

- Successfully completed a Data Science Virtual Internship focused on data analysis, machine learning, and data-driven problem solving.
- Worked with real-world datasets to perform data cleaning, preprocessing, exploratory data analysis (EDA), and feature engineering.
- Applied statistical analysis and machine learning techniques to build predictive models and extract meaningful insights.
- Developed data visualizations and dashboards to communicate findings effectively to stakeholders.
- Gained hands-on experience with Python, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn for end-to-end data science workflows.
- Improved understanding of model evaluation, performance metrics, and best practices in data science projects.
- Collaborated on practical assignments and case studies to strengthen analytical and problem-solving skills.
- Demonstrated the ability to transform raw data into actionable business insights through structured analysis.
